aristotle accurately characterized humans as political animals whether through birth or from choice people naturally cluster into groups for protection advancement and the pursuit of well being but aristotle s description does not hint at the powerful binary tension within this human tendency leaders enhance a social group s sense of identity by appealing to the members commitments and shared traditions to their hopes strengths sacrifices and fears often however they cultivate not only an awareness of difference but even a sense of superiority since for every social group there are those outsider the them maintaining a group s solidarity can too easily lead to the righteousness of intolerance towards those who are excluded the reinforcement of group identity in this way runs so deep in human nature that holding up a mirror to ourselves inevitably reveals a split image the people we want to see and the people we re glad we re not intolerance political animals and their prey presents stark examples of how the us have treated the them the papers in this volume hold up various unflattering mirrors of intolerance from the areas of history law philosophy political science and religion the authors of these scholarly studies do not condemn rather their research compels us to look at ourselves as the political animals we are intolerance political animals and their prey is the product of a year long multi disciplinary collaboration between faculty members of bard college and the united states military academy at west point the project involved parallel seminar courses at both institutions along with joint sessions all focused on the central theme of intolerance and culminated in a three day academic conference at bard in the spring of 2015 this volume inaugurates a new series being published by hamilton books under the general title dialogues on social issues bard college and west point

catastrophes for one city or the other its roots are to be found in the works of major eighteenth century poets e g william blake s london in which he seems to recognize a new form of disorder being at work within the city limits the nineteenth century brought forth poets like wordsworth who carried on to work on the theme but showed a different attitude towards the city because of its ever growing dimension it was then perceived as a totally new and symbolic phenomenon which raised philosophical questions about the state of society and the poet s role within this complex the tone of the responses to these questions was for the most part uncertain and personal finally the twentieth century gave birth to a new kind of urban literature and poetry with a symbolic meaning of the city motive which was as varied as the ethnical religious social and political shades of the human community it referred to nevertheless two tendencies may be observed within modern poetry and prose the first one dealing with the content of the city symbol when the city ceases to be a symbol of art and order writes lewis mumford it acts in a negative fashion it expresses and helps to make more universal the fact of disintegration 1 the second one is the mode major poets such as t s eliot in his famous the waste land attempt to cope with the reality of the twentieth century city a controlling framework of myth literature and history is employed in order to deal with the chaotic nature of their theme both points are to some extent true particularly for auden s later works 1 johnston 1984 246
